# Eriq John Mendoza

## Profile

Results-oriented, meticulous, and innovative web developer with more than a year of experience building various types of websites mainly using Laravel and Vue. Aspiring to establish a career with a world-renowned IT company and work in a team set up with the capacity to train others in web management.

## Work Experience

**Freelance Web Developer**

July 2020 - present

- Design and develop a Laravel website to monitor the stocks and generate pdf/excel report
- Use a third party package to generate a QR code for each of the product and a separate package to create a QR Scanner that helps every employee to monitor the items assigned to each department.
- Use VueJS extensively to create user-friendly pages and meet the clients need with the user interface

**Junior Web Developer**

PurpleBug Inc. | January - April 2020

- Develop a chatbot from scratch using a third-party API from an existing website with Laravel as backend.
- Fixed a few bugs from a customized chat system built from VueJS as the main frontend stack.
- Fixed a vital functionality from a mobile-based application using Kotlin.
- Provide a daily or weekly report with regards to the current status of the projects assigned.
- Provide on-site assistance to fix a bug of an existing web application if necessary.
- Supervise interns and explain programming concepts a lot of which are related to Laravel and javascript

**Freelance Web Developer**

September - November 2019

- Create a design that should satisfy the client's requirements.
- Developed a website that will help the client to monitor the stocks of each product in their warehouse.

**Customer Service Representative**

Cognizant Technology Solutions | November 2018 - May 2019

- Answered customer telephone calls promptly to avoid on-hold wait times.
- Maintained customer satisfaction with forward-thinking strategies focused on addressing customer needs and resolving concerns.

**MIS Intern (800 hours)**

Department of Science and Technology - TAPI | November 2017 - April 2018

- Update or install software if necessary to eliminate security problems and protect data.
- Explained technical information in clear terms to non-technical individuals to promote better understanding.
